Computational epidemiology

From Wikipedia, the free encyclopedia

Computational epidemiology is a multidisciplinary field that uses techniques from [computer science](#), [mathematics](#), [geographic information science](#) and [public health](#) to better understand issues central to [epidemiology](#) such as the spread of diseases or the effectiveness of a public health intervention.

DISEASE SURVEILLANCE

Monitoring the world to identify **outbreaks** and understand **prevalence** of diseases

Many resources are spent on **influenza** surveillance.

Important for:

- hospital preparations
- resource allocation
- targeted awareness/prevention

WHY FLU?

- **It's common**
 - occurs seasonally
- **It's burdensome**
 - takes a toll economically and mentally
- **It's dangerous**
 - ~30,000 deaths per year

WHY FLU?

**'OPEN-FACE'
SNEEZERS TO
BE ARRESTED**

Orders to arrest any person indulging
in the "open face" sneeze or cough in
public places.

**FLU CURFEW TO
SOUND FOR CITY
SATURDAY NIGHT**

Persons Not on Business Ex-
pected to Quit the Streets
at 9 o'Clock.

The curfew will ring or, rather, blow
in Chicago tomorrow night.
Promptly at 9 o'clock the whistles of

**'NONESSENTIAL'
CROWDS BARRED
IN EPIDEMIC WAR**

Churches and Saloons
Exempt; Conventions,
Athletics, Parties Hit.

WHY FLU?

INFLUENZA SURVEILLANCE

What strains of the virus are out there?

When is the flu going to arrive/leave?

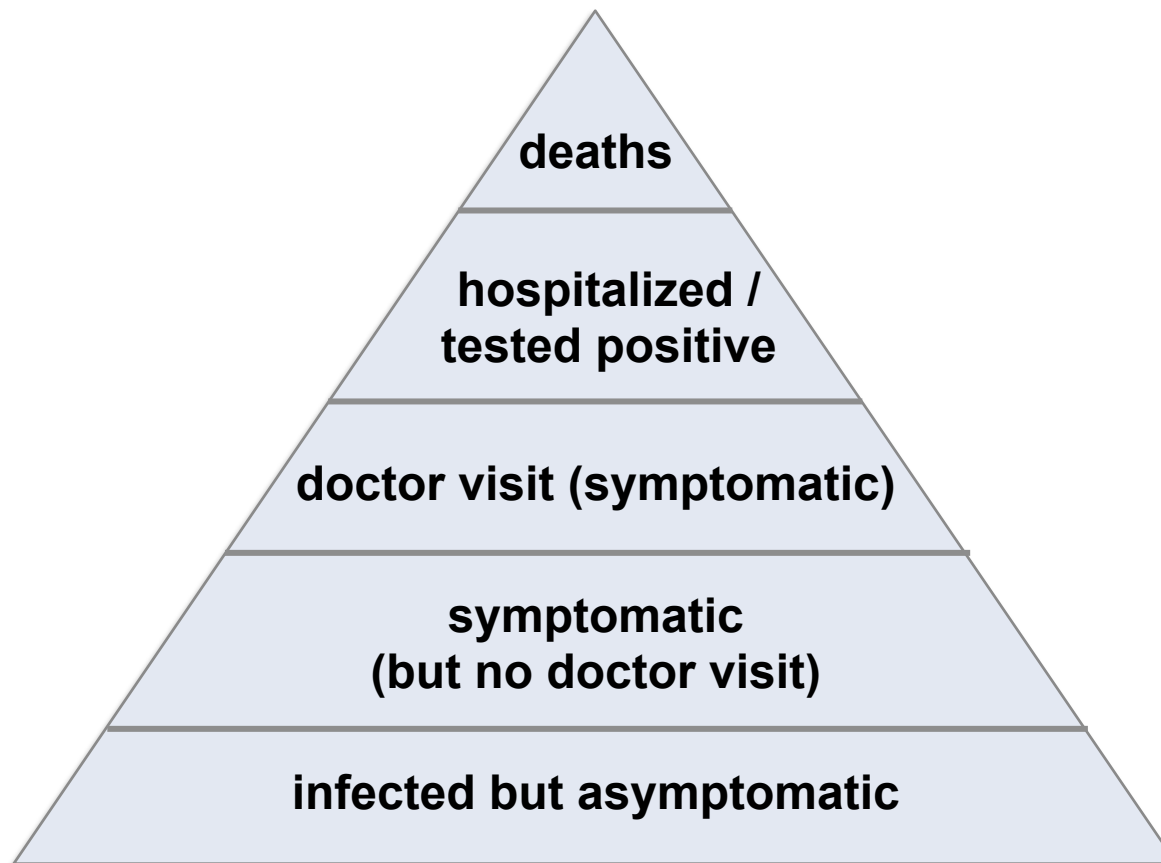

Where has the flu broken out?

Surveillance has improved since 1918...

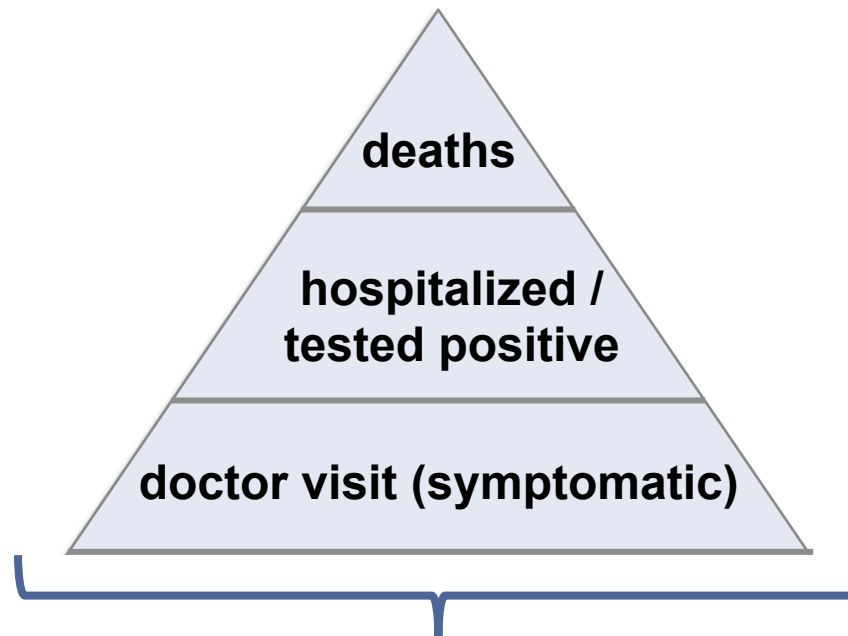

INFLUENZA SURVEILLANCE

Pyramid of influenza patients:

INFLUENZA SURVEILLANCE

Pyramid of influenza patients:

Monitored in depth by US government

- **Centers for Disease Control and Prevention (CDC)**

INFLUENZA SURVEILLANCE

- **Centers for Disease Control and Prevention (CDC)**

INFLUENZA SURVEILLANCE

How can **technology** help?

INFLUENZA SURVEILLANCE

How can **technology** help?

Electronic health records

- Reliable, accurate data
- Easy to access
- Fast to synchronize
- ... but not well implemented yet

INFLUENZA SURVEILLANCE

How can **technology** help?

Internet data

- Search queries

- Social media

INFLUENZA SURVEILLANCE

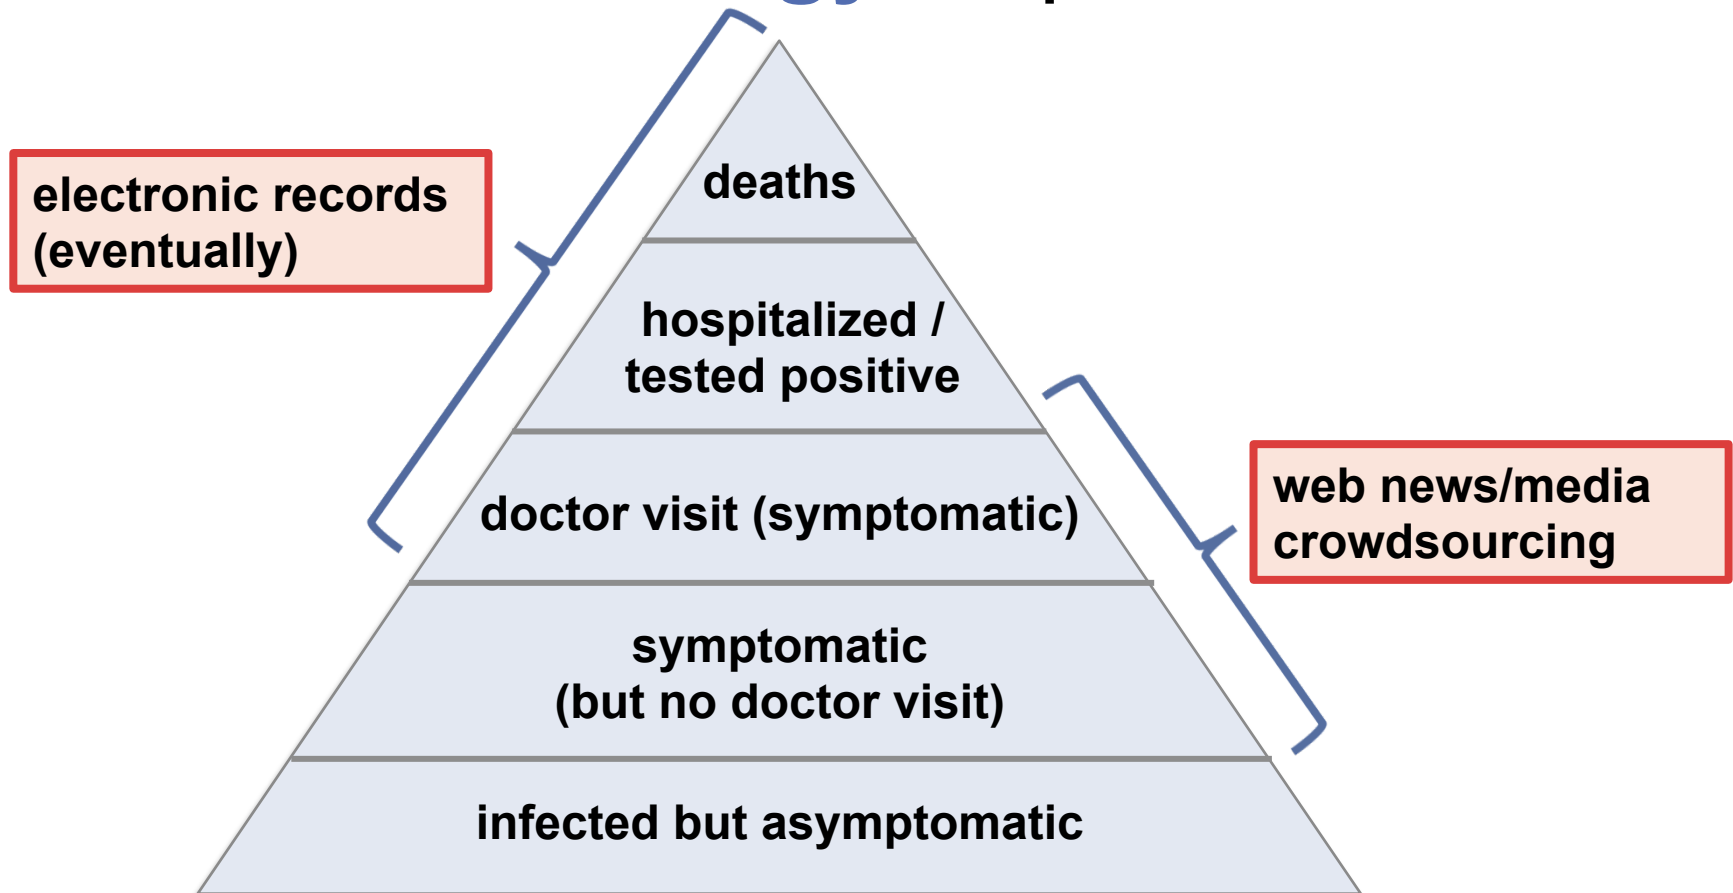

How can **technology** help?

Internet data

- Faster than traditional surveillance
 - but less accurate, so there's a tradeoff
- Very cheap to obtain
- Information outside the hospital system

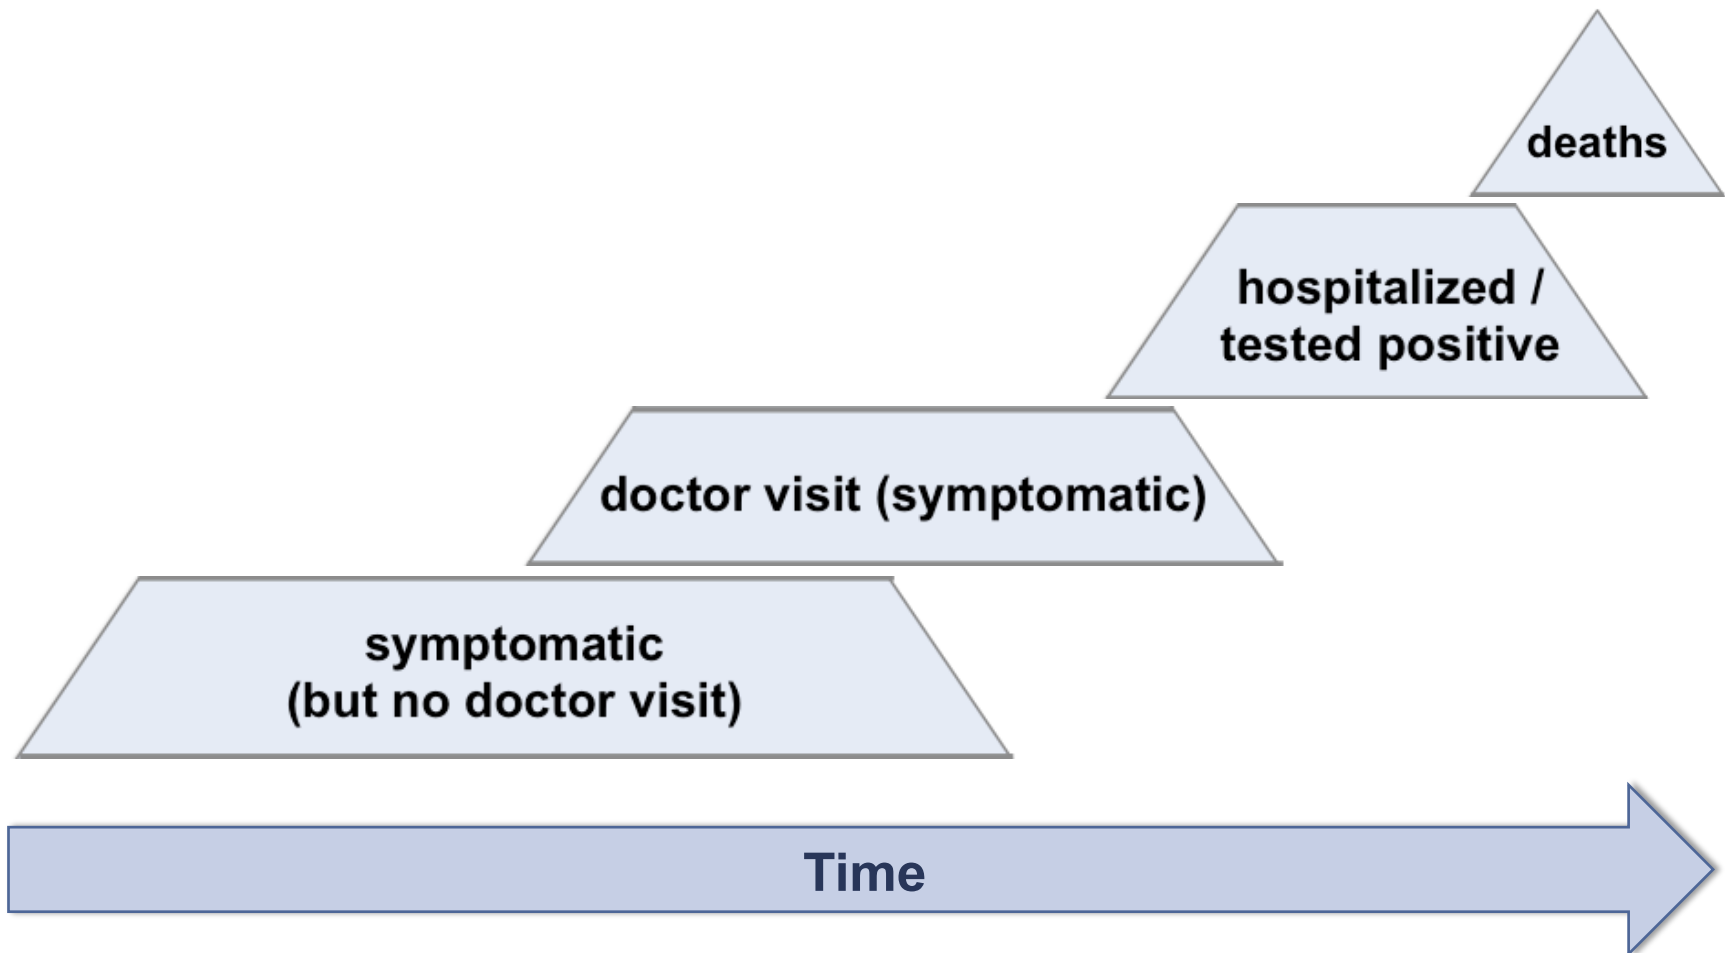

INFLUENZA SURVEILLANCE

How can **technology** help?

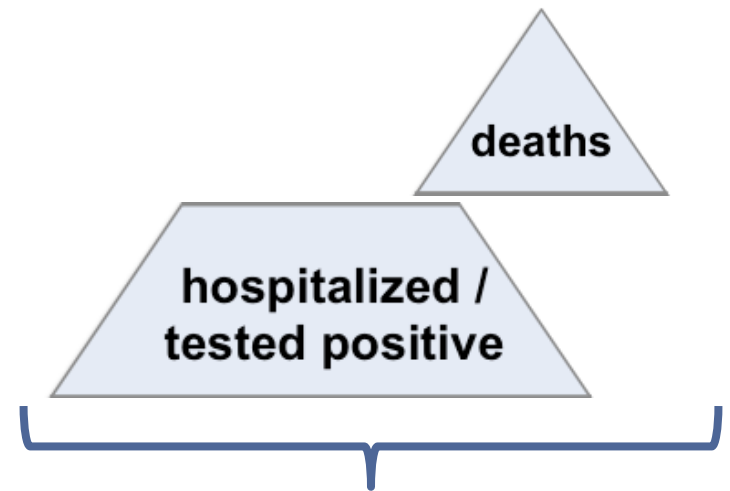

INFLUENZA SURVEILLANCE

The pyramid is also a timeline:

INFLUENZA SURVEILLANCE

The pyramid is also a timeline:

- historic gold standard
- slow – relies on lab tests

INFLUENZA SURVEILLANCE

The pyramid is also a timeline:

syndromic surveillance

- look for symptoms without testing
- faster – newer idea

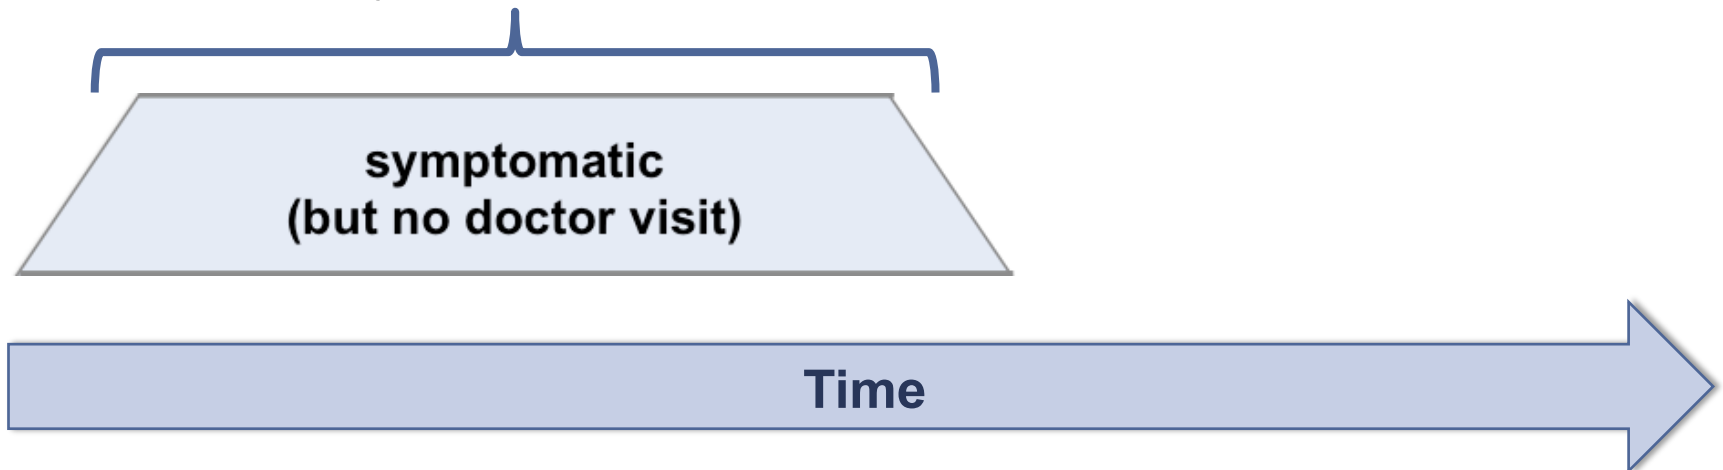

INFLUENZA SURVEILLANCE

The pyramid is also a timeline:

not part of traditional surveillance

- can only get from surveys, self-reports
- potentially fastest indication of infection

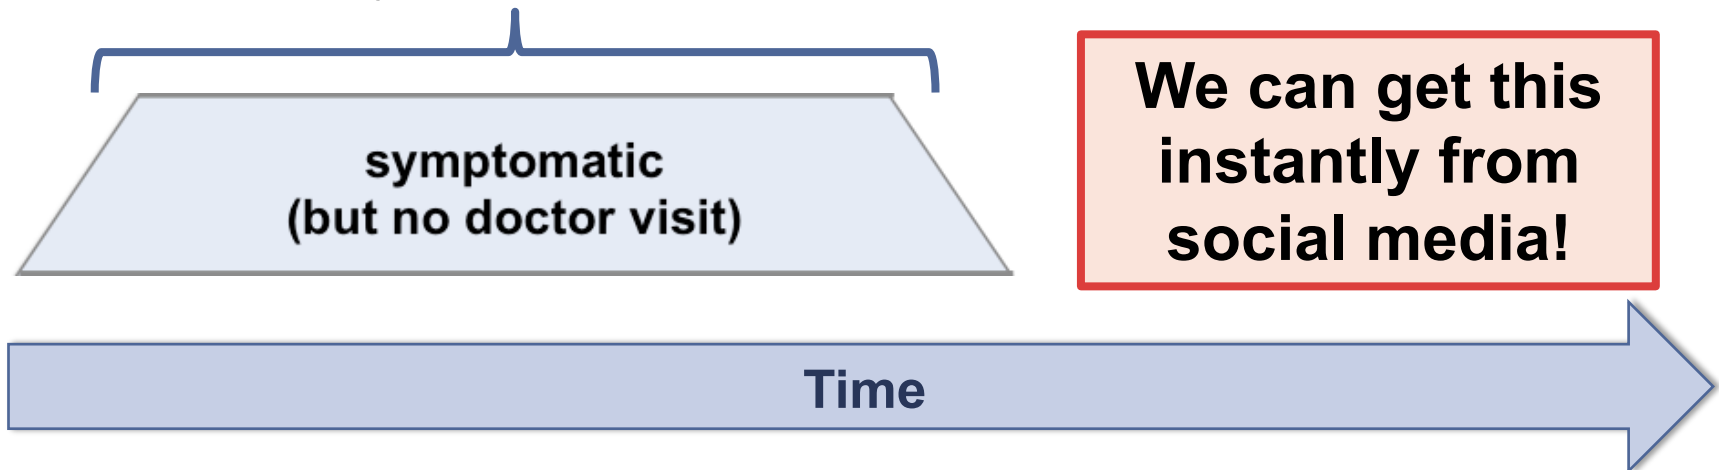

INFLUENZA SURVEILLANCE

The pyramid is also a timeline:

not part of traditional surveillance

- can only get from surveys, self-reports
- potentially fastest indication of infection

SOCIAL MEDIA

Twitter is often used for research

Users share short “status messages” about what they’re doing and thinking

- 500 million tweets daily
- generally public
- used worldwide

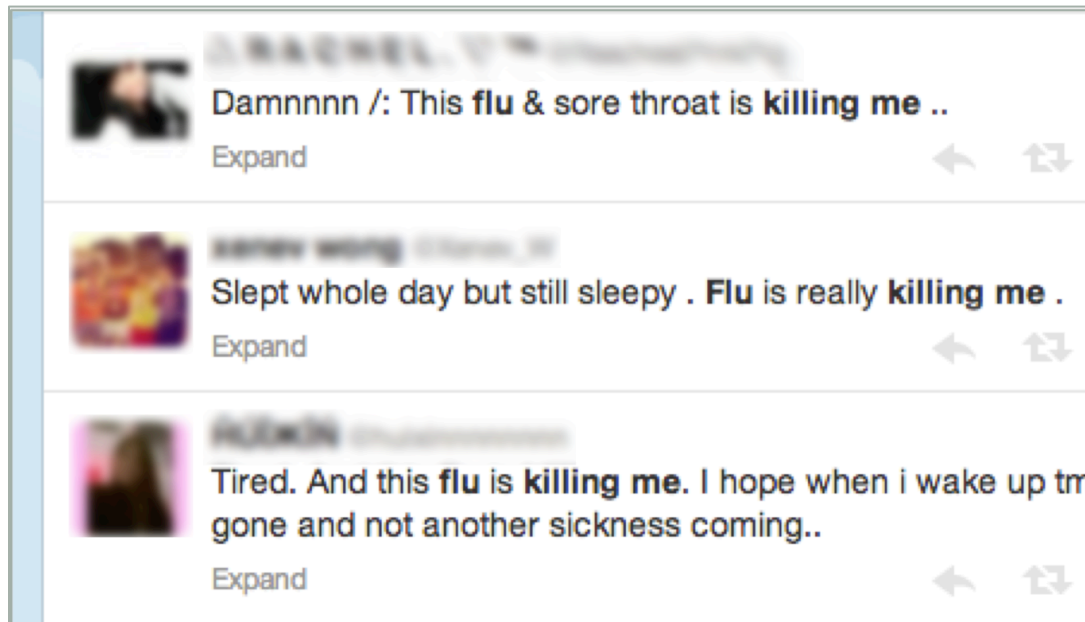

visualization by Miguel Rios

FLU TRACKING WITH SOCIAL MEDIA

Real-time tracking through Twitter

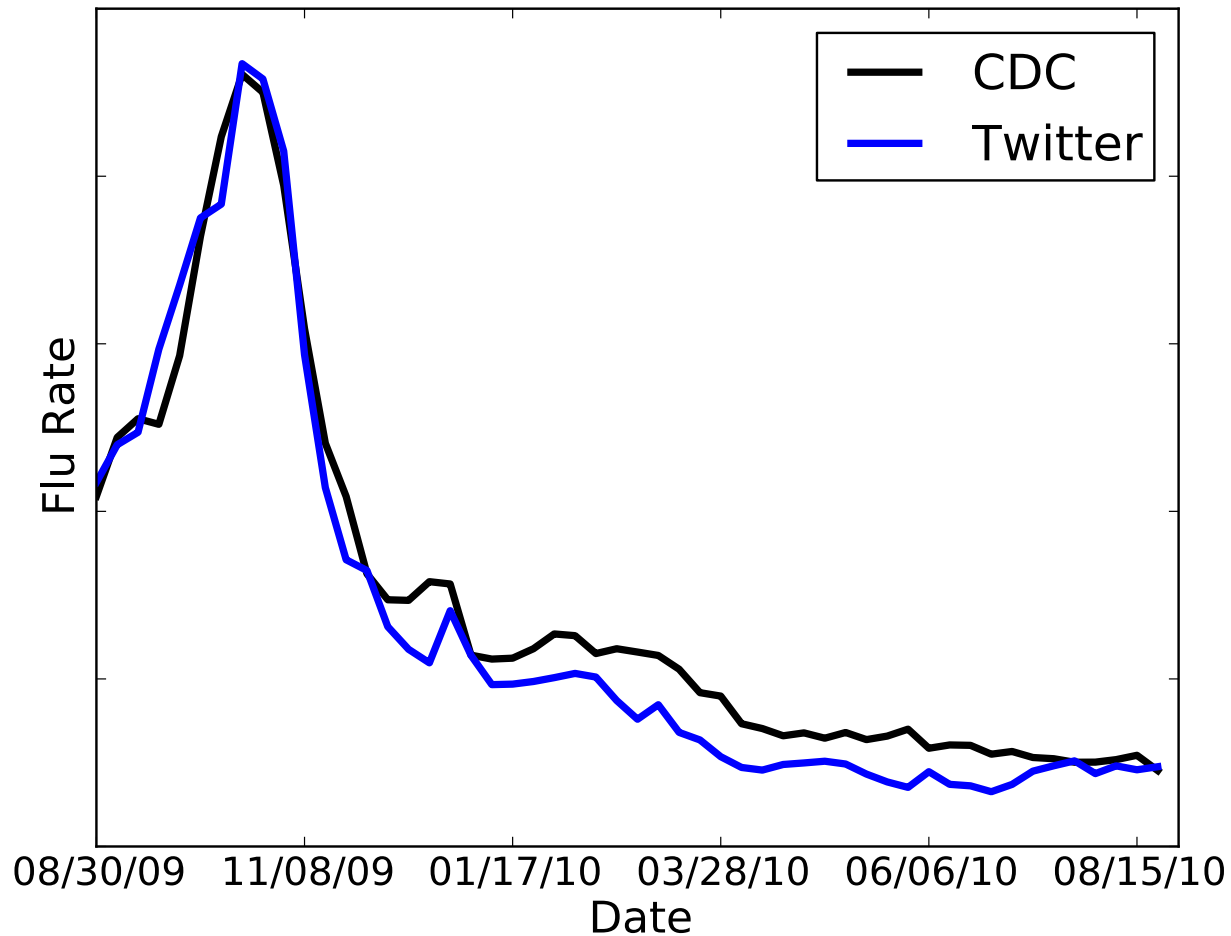

Use algorithms to aggregate tweets describing flu symptoms

- this gives us daily estimates of flu prevalence

发 布 时 间	2013年3月31日 00:10		

标 题 江宁区发现一例人感染甲型H7N9流感病毒病例

3月30日晚，我区一居民被省市疾控、卫生部门诊断患有甲型H7N9流感病毒疑似病例，而该正型感染病例属于国内首次发现。目前患者正在鼓楼医院救治。

患者 [REDACTED]，女，45岁，家住江宁区 [REDACTED] [REDACTED]，在江宁区东新农贸市场从事家禽宰杀工作。患者3月23日晚出现发热、咳嗽等症状，23日病情加重，至江宁区中医院就诊。24日病情进一步恶化，予以气管插管、呼吸机辅助通气，当晚转至鼓楼医院ICU，病情危重。28日下午，鼓楼医院采样送至市疾控中心检测。29日，市疾控中心初步检测甲型流感病毒核酸阳性。30日，省疾控中心复核结果阳性。30日下午，省疾控中心检测初步确定为H7N9阳性。30日晚8:00，经省、市专家会诊，初步认为此例病例为人感染甲型H7N9流感病毒疑似病例。特上报国家卫生和计划生育委员会确认。
